

REFILL • REUSE • RECYCLE

Evans non-aerosol alternative to conventional sprays.

Flairosol® is a next generation solution for dispensing liquids, which is free from pressurised gases and, unlike aerosol cans, bottles can be refilled and reused repeatedly*.

You can refill the Flairosol® unit from a 5 L bottle using a pelican pump or aero flow tap. Single and double cages are available to hold 5 L bottles securely while refilling.

Description	Code	Pack
